

Certificate in N+ Network Technician

offered as a short course / modular programme

Overview

These days it is rare to find a computer system that does not connect to a network of some sort and thus an understanding of the principles of networking is vitally important to the computing professional.

This course provides a broad introduction to networking, ranging from underlying media to the deployment of networks in business. The aim is to provide a student with a good understanding of modern networks and the intellectual and practical skills to support the specification and deployment of networks.

Course Duration

Ten days or Twenty evenings

Course Cost

R2995 per person*

*Pricing subject to change

(A minimum of 10 candidates are required per course.)

Entry Requirements

All short course programme offerings requires at least a Grade 12 qualification. It is advantageous if the student has qualifications or training in computer usage.

Certification

On successful completion of all short course programmes, candidates are awarded an attendance, Provider-based certificate.
